

Stimulating SOIL BIOLOGY

**RIOGEN. FAST-FORWARDING REGENERATIVE AG.
BY RIOMAX®**

Rhyzogreen™ is a direct food-source for the soil microbial population which impacts root structure, plant health & resilience and ultimately yield. Bottom line, soil health directly correlates to plant health. There's an enormous amount of nutrients in the soil, but only a small percentage are available in a form the plant can use. It takes the soil's microbes to convert soil nutrients into a form plants can absorb and use. And if a soil's microbial community is stressed by poor growing conditions such as soil compaction, excess moisture, too little moisture, up to 80% of microbes can remain dormant or inactive.

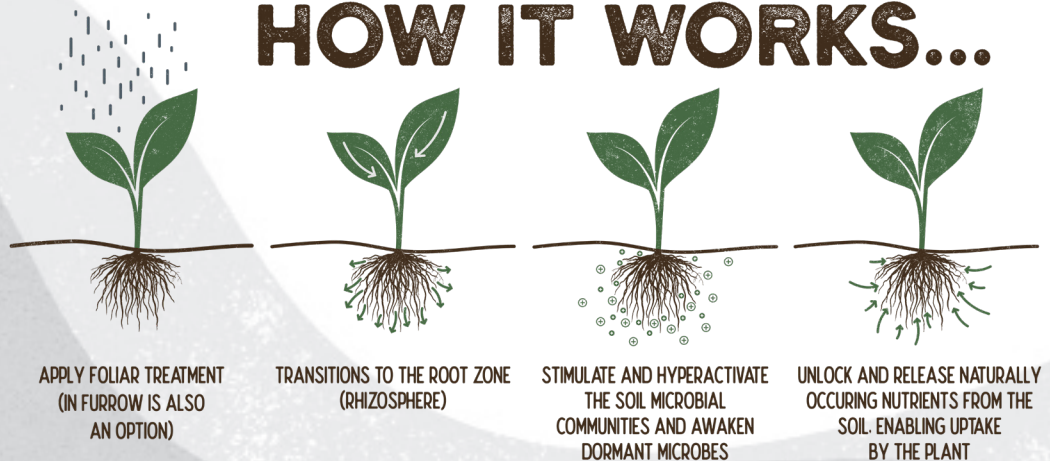

EFFECTIVE FOR PASTURE IMPROVEMENT, HAY MEADOWS & CROPLAND!

Canola
COTTONWOOD, IDAHO

TREATED IS BLOOMING AHEAD OF UNTREATED

HOW IT WORKS...

**10.21% INCREASE
IN YIELD**

ONE ACRE TREATED

ONE ACRE CONTROL

YIELDED 4,315 lbs

YIELDED 3,915 lbs

14%

INCREASE IN BRIX
(Proteins, sugars, organic
acids, amino acids,
mineral,
lipids & pectins)

11 months after foliar treatment.

19.6%

**INCREASE IN
MICROBIAL
ACTIVITY**

6 days after foliar treatment.
