

15%-30%

FORAGE SAVINGS

For example,
hay costs \$230/ton (12¢/lb)

If we save 15% hay (conservatively)

When feeding 30 lbs per day, that's 4.5 lbs
saved. Net worth of saved hay is 54¢/hd/day
Average Riomax® cost/head/day is 43¢. Then
take out what your mineral costs (±10¢)

43¢-54¢-10¢= -21¢

*In this scenario, you are making 21¢/head/day
and feeding Riomax® for free!*
