

# 15%-30%

## FORAGE SAVINGS

For example,  
hay costs \$230/ton (12¢/lb)

If we save 15% hay (conservatively)

When feeding 30 lbs per day, that's 4.5 lbs  
saved. Net worth of saved hay is 54¢/hd/day

Average Riomax® cost/head/day is 55¢ CAD

Then take out what your mineral costs (±10¢)

$$55¢ - 54¢ - 10¢ = -9¢$$

*In this scenario, you are making 9¢/head/day  
and feeding Riomax® for free!*
