

TRIAL: RIOMAX PG360 VS 'THE SAME, BUT CHEAPER' TUB

Performed by RIO NUTRITION **LIVELAB** May-July 2026

RIOMAX GROUP

5 cows on low quality chopped hay

14% less hay consumed by weight (they're getting more out of what they're eating, so they eat less)

Copper Levels in the Liver
23.7% greater increase from Day 1 - Day 60 (Riomax minerals are increasing the mineral status more significantly)

BRAND X GROUP

5 cows on low quality chopped hay

MANURE ANALYSIS

✓ 22.34% less undigested solids in the manure (which correlates to hay savings)	LEFTOVERS	✗
✓ 49% less copper (meaning better absorption into the cow)	COPPER	✗
✓ 59% less zinc (meaning better absorption into the cow)	ZINC	✗
✓ 35% less manganese (meaning better absorption into the cow)	MANGANESE	✗
